NATIVE SHRUBS AND PLANTS

We can furnish any of the native trees, shrubs, plants or ferns that grow in this vicinity.
Large tracts of wood and pasture land are at our disposal, from which we can obtain any of these native plants.

ROSES

As long as they exist ROSES will retain their dominant grip upon the affections and appreciations of flower lovers.

Dormant roses should be well watered and the tops protected from the sun until the buds show growth, for the failure of most roses to live is due to lack of moisture.

We can supply field-grown dormant plants at 65c each, \$5.50 per 10; extra heavies at 85c each, \$7.00 per 10.

After May 25th. we can supply most of these varieties in field-grown, budded plants, well established in pots, for 85c each, \$7.00 per 10.

HARDY PERENNIALS and ROCK PLANTS

Perennials comprise most of the best flowers as well as the foundation of any well planned garden. They exist in infinite varieties, sizes, colors and seasonable bloom.

The material we grow is strong field grown stock with the exception of some varieties which transplant better grown in pots.

We offer perennials in quantities of three, instead of singly, as we believe generally speaking it isn't practical to get a satisfactory garden effect by using one plant of a kind. Please remember that five plants or more of one variety will be priced at the ten rate and that twenty-five or more of one kind will be entitled to the hundred rate when such rate is given.

Plants marked with (r) are particularly adapted to the Rock Garden.
